

Press release

ecoTEC exclusive sets green standards

- **The highest efficiency with extremely cost-effective, environmentally friendly operation**
- **Integrated Web interface for intelligent connectivity**
- **With its multiMATIC control concept, ecoTEC exclusive might receive an A+ as a system label**

Frankfurt am Main/Remscheid, 10 March 2015 – The German heating and ventilation specialist Vaillant is presenting its wall-mounted gas-fired condensing boiler ecoTEC exclusive from its new Green iQ range at the ISH trade fair in Frankfurt am Main. Just like the other products in Vaillant’s Green iQ range, ecoTEC exclusive also sets new standards in terms of efficiency, sustainability and connectivity. An integrated Web interface and an intelligent service concept are both fixed features. In addition, ecoTEC exclusive can be operated completely using bio natural gas. The Green iQ mode guarantees the most efficient operation at any time. A new, Web-enabled control unit is integrated into the appliance, enabling the user to control heating easily via the free multiMATIC app for smartphone. Skilled technicians can manage, troubleshoot and complete parameter control for the appliance online using the profiDIALOG remote diagnosis system. This saves time and money.

“With our new ecoTEC exclusive product, we are strengthening our premium brand and building on our position as an innovation leader,” says Dr Marc Andree Groos, CEO at Vaillant Germany. In combination with the multiMATIC 700 control concept, the new ecoTEC exclusive might attain the efficiency label A+. End customers can control the appliance via the multiMATIC app on their smartphone thanks to a Web-based interface. ecoTEC exclusive is available in the output classes of 15, 21, 27 or 32 kW.

Limited Edition: following in the footsteps of Johann Vaillant

ecoTEC exclusive will also be available as a limited edition version with which the company will honour the merits of its founder. The front of the appliance features the first patent drawing by Johann Vaillant of the gas-fired bathroom boiler, as well as his signature. The limited edition version will be restricted to 1,874 items – representing the year that Vaillant was founded, 1874.
